Eclipse Brand Seeds

Eclipse is our Trade Brand. Eclipse represents the last word in quality. When you buy Eclipse Brand, you get the last word in seeds. No matter where you go for seeds, you cannot buy better quality. With the most modern equipment that experience and money can buy, we maintain a standard of perfection that few can equal. You are buying the best when you buy Eclipse Brand Seeds.

To Our Thousands of Customers and Friends

WE are more than pleased to again present to our many customers our annual catalog of Quality and tested Seeds. Like many other years, the past year has been our best. Seeds, both Field and Garden have been sent out to more distant points in greater volume than before, and the many letters we have received from satisfied customers, has more than repaid us for our continued efforts to furnish you with pure high germinating seed. You can always buy from us seeds that have been carefully selected, thoroughly cleaned and re-cleaned, and of the highest purity and germination tests

CLARKE & KELLER SEED STORE is the oldest Seed House in Oklahoma, established in 1901 and is still under the same management. We have, by constant effort to please, built up one of the largest Seed Houses in the Southwest. We not only have a large trade in Oklahoma, but we enjoy an increasing business each year in all the states of the South and Southwest country. You are always safe in buying, or advising with us in everything regarding seeds.

Warning

When you are offered seeds from out of the state seedsmen at a lower price than the seed is offered you at home, be sure and ask for a sample before buying, and you will find that the seed is, in a large majority of cases, of an inferior grade; and in a great many cases will contain noxious weed seed that will ruin your fields for years to come.

Seed Laws

Seeds purchased from us will be labeled to comply with the laws of your state. We are familiar with your state's requirements and will comply with the demands of the state in which you reside.

Please Note

We want you to read the preceding pages in order to familiarize yourself with our aims and endeavors in presenting you the following varieties of field, garden and flower seeds. We wish we could see you face to face to give you this message, but since we can't, won't you read each word of it carefully, believing it as an expression of our true feelings and wishes?

IMPORTANT

Cheap seeds are dear at any price and are a losing investment.

Clarke & Keller's Eclipse Brand

Tested and cleaned seeds are equal in every way to the best that can be produced; no better can be bought at any price.

Our Terms are Cash F. O. B. Shawnee

Soliciting your orders with our promise that we will give you honest goods at honest prices.

Yours for better production,

Clarke and Keller Seed Store
Shawnee, Oklahoma

Alfalfa Seed

Regardless of where you buy alfalfa seed, buy the best grades. The better the grade, the better the vitality, purity and germination. Good plump, well matured seed, free from impurities, thoroughly cleaned and graded, are like the best ear of corn in the crib, and gives by far the best results.

When you put seed in the ground to produce a crop for years to come, it should be the best that can be produced. It is a waste of time and money to plant seed that is full of noxious and other weed seed, that befoul the land, lowers the grade and in every way is a loss to the grower. Look at the label on the bag when you buy it. See that it is free from dirt, chaff, weed seeds, and that it states the origin.

Alfalfa yields more tonnage of high protein feed than any crop grown on the farm. It will resist drouth more than any crop. It builds up the soil and for the past two years has paid more profit than any other crop. Our alfalfa seed is Oklahoma Grown. We send our buyer into the fields when threshing begins, and he is instructed to buy only the best crops. This is the seed we offer you, and we will gladly send you samples if you ask for them. Cleaned and graded over the best electric machinery makes it the peer of any seed offered on any market.

10 lb. lots at \$2.50, f. o. b., Shawnee, Okla. Ask for prices on larger amounts.

Shawnee, Okla., Nov. 16, 1929.

Clarke & Keller Seed Store,
Shawnee, Okla.
Gentlemen:—

This past spring I sowed about 30 acres of alfalfa with your Eclipse Brand alfalfa seed and I wish to advise you that the germination was perfect. It seemed that every seed grew and in spite of the 64 day drouth this year, I was able to secure three heavy cuttings of hay. My old fields sown from your Eclipse Brand seed will show me a net profit of \$75.00 per acre this year on the hay alone.

On my 40 acre field of Yellow Dent seed corn, the seed for which I purchased from your stock of the special improved strain, I have made 65 bushels to the acre. This corn was too hard for roasting ears on the 4th of July this year.

Having dealt with your firm for over 20 years, I am in position to heartily recommend your seed stocks to all prospective customers.

Very truly yours,

Wm. Jarvis.

Seed Oats

Kanota Seed Oats

The oat crop of 1929 was much smaller than for some years. The oats were lighter than usual, but the heavier lands produced the best and from these fields, we secured our supplies. Our seed oats, after being cleaned and graded over our seed cleaners, are the best oats we have seen and are high class seed. Kanota oats are earlier than the Texas Red Oats, maturing a week or 10 days earlier. They are closer husked and since being introduced have given the best of satisfaction. Treat your seed with "Ceresan" to prevent smut and increases your production. Our special price on these oats is 85c per bu., f. o. b. Shawnee, Oklahoma.

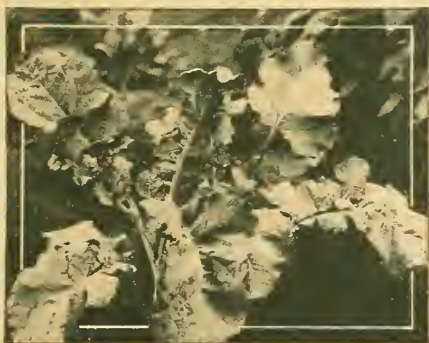

Texas Red Rustproof Oats

We have the best of the crop to offer. As with Oats in general they are lighter than usual, but we have the best of the crop and we cleaned them close, so that the germination is high. Nice bright seed, far above the average and the old stand by of the South. Treat with Ceresan and increase yields by preventing smut. It will pay you. Special price of 85c per bu., f. o. b. Shawnee, Okla.

Rape Seed

(Holland Grown)

DWARF ESSEX—Rape is a long season forage plant as a green feed, producing huge quantities of feed for the hogs, sheep and poultry. It is high in feed value. Can be planted by March 1st and grows until heavy frost. When pastured it keeps coming and producing. A valuable feed. 20c per lb. Ask for prices on large quantities.

SWEET CLOVER

White Blooming Sweet Clover

Biennial Type and Seed Scarified

This is the popular variety for the South and is growing fast in favor as a pasture, hay or cover crop. It has the feed value of alfalfa and will grow on the thinnest soil you may have. It has a very extensive root system, penetrating deep into the ground. It is one of the greatest fertilizers of all the legumes, and builds up the soil to its original fertility. More and more is planted every year. We have fine stocks of the White Blooming Biennial, the Yellow Biennial and the Grundy County White Blooming Biennial. Sweet Clover is only about one-half a crop in seed production this year, and prices will be some higher. We have bought our stocks right and can name you the most attractive prices.

Inoculate with Nitragin for best results. See page 16.

Price per lb.	25c postpaid
20-lb. lots for.....	\$ 3.60 F. O. B. Shawnee
50-lb. lots for	6.00 F. O. B. Shawnee
100-lb. lots for.....	10.00 F. O. B. Shawnee

Lespedeza or Japan Clover

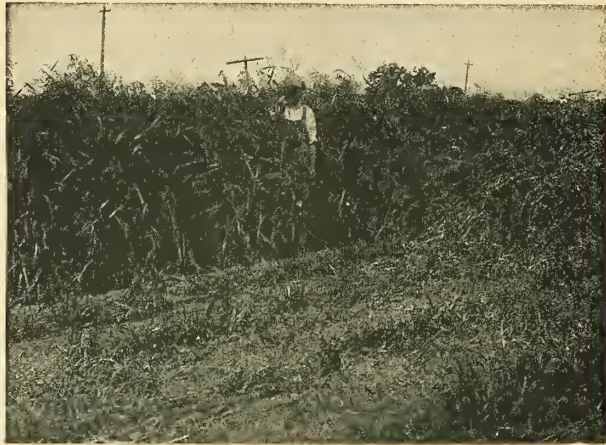

A wonderful prolific grower, relished by all stock. It is adapted to any soil of the south. Does well in wooded sections, and on heavy bottom lands can be cut for hay. We have never found one who has planted it, but that has been highly satisfied. Especially valuable is this clover when planted in rough places that may not be producing anything that can be pastured. 30c lb., 2 lbs., 50c.

Grass Seeds

Besides the grass seed and clovers we carry that is more generally used in the south, we can furnish you with Timothy, Red Top, Orchard Grass, Brome Grass, Rye Grass, Spring Vetch, Winter Vetch, English Blue Grass or Meadow Fescue. These varieties are carried only in the best grades and we offer them at market prices. Ask for prices.

Sudan Grass

An all around successful and dependable grass. Will grow on any land, and produce under the most unfavorable conditions, the heaviest crops of hay or pasture that can be grown under the same conditions. In good seasons growers have grown five cuttings averaging in some cases more than a ton per acre. For pasture nothing produces as much feed as sudan, and it is highly relished by all stock. For a hay crop when cut at the right time and properly cured, it makes a fine hay. Its feeding value is acknowledged and the tonnage secured makes it one of the most valuable crops that the farmer grows.

Our supply comes from growers who are old in the game, and our stocks are always of the best quality. We are among the largest distributors of sudan grass seed in the country, handling hundreds of thousands of pounds to supply our large trade. Buying only the highest grades and recleaning over our most modern cleaning machinery. We offer only the highest grade of seed that can be produced. Don't pass up Sudan. At the time this is being written the market on Sudan is very unsettled. There is a wide difference of opinion as to amount that will be harvested and it is impossible to name a price that will protect either the buyer or seller. Ask us for prices and we will name you an attractive price.

Sugar and Stock Beets

High in sugar content makes Beets a fine winter green feed for the poultry, cows and hogs. They make a rich feed, relished by stock and poultry and easy to keep. Plant for best results in 18 inch rows and thin to ten inches in the row. Store in basement or hill out in the open. About one-fourth the daily ration can be fed. The following sorts have proven best.

	Oz.	¼ Lb.	1 Lb.
Golden Tankard	\$0.10	\$0.20	\$0.60
Giant Feeding10	.20	.60
Mammoth Long Red10	.20	.60
White Sugar10	.20	.60
Lane's Sugar	10.	.20	.60

Cowpeas

Cowpeas are one of the heaviest producing legumes that grow. They are also one of the best soil builders that can be planted. High in protein and fat they are next to peanuts as a profitable crop. They gather nitrogen and ammonia from the air and store it in the roots, adding greatly to the richness of the soil. You can cut the vines for hay, as the fertilization has been added through the roots. They grow an im-

mense tonnage of hay and the peas keep well. We handle all of the standard sorts, Whipporwills, New Eras, Red Rippers, Black Eyes, Crowders and Clay Peas. Broadcast one bushel to the acre, or plant in rows at the rate of 10 to 12 pounds per acre. Use Nitragin for inoculation. It will pay you many times.

Big German Millet

New Crop

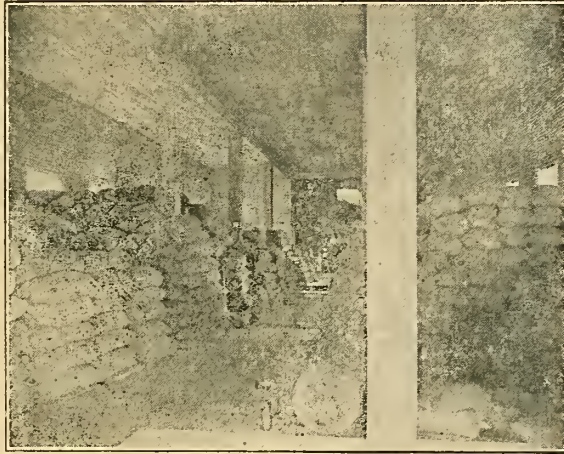

The large poultry keepers grow it for laying hens, feeding it in the straw, in the scratch pen. For hay sow 25 lbs. to the acre; for seed 15 lbs. per acre.

Ask us for samples and prices.

The most popular Millet grown, producing more of both seed and hay than any other Millet. Our Eclipse Brand is the highest grade of pure high germinating, double cleaned seed that can be ordered. Carefully selected seed grown from cultivated Tennessee seed stocks and grown by as efficient growers as can be found, we are confident that the quality is 100% good in every way. Millet will make a hay crop in 60 days. It grows on any soil and makes a fine feed for milk cows. We sell thousands of pounds to the dairy people.

Spring Barley

Barley yields well in the Southwest. Where corn will not do well, Barley is a fine substitute. It makes quick and has a feed value next to corn. Many farmers have pulled through a bad year with Barley. Our stocks are good pure seed and we offer the seed at \$1.25 per bu., f. o. b. Shawnee, Okla.

Interior View Showing How Our Seeds Are Stored

Other Field Seed Items

We sell pure strains of Wheat, Rye, Spring and Winter Barley, Hard and Soft smooth head Wheat, Spring and Winter Rye, Spring and Winter Bearded Barley and Winter Turf Oats. All carefully selected and re-cleaned at market prices.

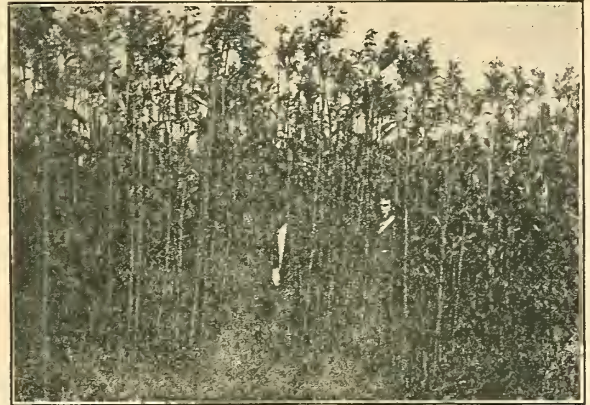

Peanuts

Plant Peanuts on your light, sandy soils. They will grow on any soil, but will produce on the sandy soils a little better than most anything else. You can produce a high protein hay while you are growing a crop that can be turned into either a feed or money crop.

SPANISH PEANUTS—This variety is the favorite in the southwest, and has paid for the land they grow on in many instances in one crop. Our seed is carefully selected and properly prepared for the planter.

TENNESSEE REDS—This variety is the most favored by the people for eating. Rich in oil and of fine flavor, they are always in demand at paying prices. They grow like the Spanish variety, producing a top growth bunched as well as a close root crop. By pulling the plant out of loose soil you can get all the nuts on the vine. A fine feed, but especially relished for eating in the home.

WHITE VIRGINIA JUMBO—This variety has a running growth of vine, and to secure all the nuts, they must be plowed out. They are larger than other kinds and very good for roasting and eating. More moisture is required to grow the crop than is required by other varieties.

Seeded Ribbon Cane Field

Saccharine Sorghums

Used for syrup and feed, adapted to the South and especially arid sections. Cane seeds of all varieties are scarcer this year than they have been for years past. The great increase in acreage of wheat in the sections producing the seed has reduced the acreage very materially and with the dry growing season there will be a shortage of seed and higher prices. Owing to these conditions we are unable to name prices, but you will find by asking us that we are always in line, and will furnish you the same high grade of seed as we have in the past, and at the lowest possible prices. We will have to offer the following varieties:

RED TOP or **SHUMAC**, **EARLY ORANGE**, **KANSAS ORANGE**, **SELECT HONEYDRIP**, **EARLY BLACK AMBER**, **TEXAS SEEDED RIBBON**, **JAPANESE SEEDED RIBBON**.

All seed stocks are thoroughly re-cleaned and of highest purity and germination. Write for prices.

Dargo Field

Field of Hegari

Non★Saccharine Sorghums

Kaffircorn, Milomaize, Hegari, Feterita, Etc.

The best growers in Oklahoma, Texas and Kansas grow our non-saccharine sorghums. Growers that know—that grow for the seedsman, and put everything into this work that is required to produce seed that will please the most critical are the ones who produce our seed stocks. Thousands of customers depend on us year after year for their field seeds, and the list is growing every year. Dwarf White Blackhull Kaffircorn, Dwarf Yellow Milomaize, Dwarf and Standard Hegari, Dwarf Feterita and Darso are members of this great family of crops that do well in the Southwest. Our stocks are fresh, new crop, pure and high germinating seed. In small lots these seeds sell for 20c per lb., 2 lbs. for 35c, postpaid. 25 lbs, 7c per lb., 50 lbs. 6c per lb., 100 lbs. for \$5.00. Ask for samples.

Kaffir Corn

Fertilizer for the Field Crops

We are agents and carry in stock Swift's Red Steer Brand of fertilizers for corn and cotton, potatoes and root crops, as well as for the gardens and lawns. We also carry Potash, Nitrate of Soda, Lime and Bone Meal. Our customers using fertilizers are getting double the amount of production where they fertilize. You can do as well.

Certified Seed Corn

The South is becoming more careful in the growing of corn. By the use of better bred and more carefully selected seed this store has kept pace with the demand for certified seed, the use of which the maximum production is achieved. The highest grade of selected seed, bought from one of the largest seed corn concerns in the U. S. is bought each year; this we furnish the best growers of this section to grow the corn that we offer you. Hand picked, nubbed and tipped, graded and cleaned; you will find our seed corn uniform in size, insuring a good stand of corn that will be far superior to the commercial grades offered by many dealers.

Careful elimination of all inferior ears, our force of efficient workmen select only the best of the field and then re-sort before our critical selection is made. Owners of the finest fireproof warehouse and the best and latest equipment that money will buy, we are prepared to furnish our customers a seed corn that will satisfy. If you buy seed corn from us and it is not satisfactory, return it and we will return your money and pay all carriage charges. Treat your seed corn with Semesan Jr. to insure stands and freedom from diseases.

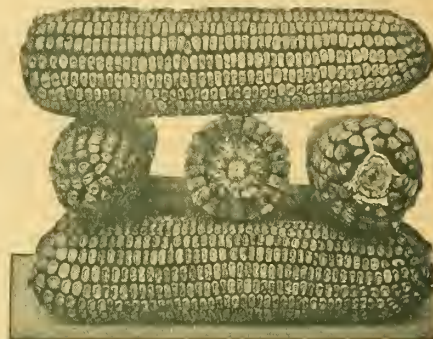

We want to tell you about a master farmer of this section and his experience with our Reid's Yellow Dent seed corn. He called for late seed to plant on 40 acres. We asked him at what stage of maturity his corn would be in during July and August if planted at the time he called. In figuring it up he saw it would be in silk and tassel, and that our usual weather at that time of year was hot and dry; that he would more than likely have a small yield if such was the case. He then decided to plant Reid's Yellow Dent. The Reid's was in roasting ear by July 1st and at gathering time this fall he husked out 65 bushels per acre of hard, firm corn. This stock was from our seed, selected as described in this catalog.

Early Yellow Dent

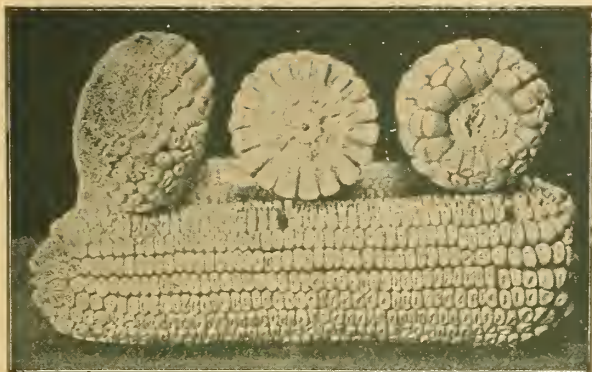

Certified

Matures in 90 days. Has bright golden color. Ears good size. Is heavy and filled to the ends. Will be made before July 1st if

planted by April 1st. Made 52 bushels per acre this year on medium soil. The best and surest yellow corn grown on the upland of the south. For the lighter soils this is the safest corn you can plant early—of the standard varieties. This year's crop shells out 58½ pounds per bushel. It has small cob. One pound 25c; two pounds, 40c, postpaid. Not prepaid—one peck, 85c; One bushel, \$3.00.

Early Yellow Dent

Iowa Silvermine

This is one of the old standbys, being a 90 day corn, nearly certain to make and very popular with those wanting a white corn. Is a heavy yielder on the heavy soils and will make on the average upland soils if any corn can be made. Our seed stocks from special acclimated strain grown in Oklahoma.

Surecropper

This corn is an early maturing, drought resisting variety that is growing in popularity every year. It can be planted in summer on stubble ground and will produce a much larger tonnage than June Corn. Ears are large, corn white and run 14 or more rows to the ear. 1 lb. 25c; 2 lbs. 40c, postpaid. Not prepaid: 85c per peck; \$3.00 per bu.

Improved Squaw Corn

This is a fine drought-resisting corn, producing ears 10 to 12 inches long. Its color is blue, red and white. Fine for roasting ears or for hogging down. Grows 5 to 6 feet, has 1 to 3 ears to the stalk, and matures in 75 days. Lb. 30c; 2 lbs. 45c; postpaid. Not prepaid: \$1.25 peck; \$4.00 bu.

Hickory King

White corn with smallest cob. Kernel will cover the end of cob. Largely planted for roasting ears, hominy and meal use. Lb., 30c; 2 lbs. 45c; postpaid. Not prepaid: \$1.25 pk.; \$4.00 per bu.

DON'T TAKE CHANCES THIS YEAR. Buy early as the best grades of many seeds are much scarcer than on many years past. High grade alfalfa is one; Big Head German Millet and cane seed of all varieties are scarce. We have had men in the field constantly who have found the best of these seeds, which we are glad to offer to our customers.

Cotton Seed

"Oklahoma Triumph No. 44"

Not as old a variety as many others, but a cotton that has made a wonderful record during the past three years. This cotton has created a great demand from the spinner on account of its long staple and great strength. Our seed is grown by one of the most successful cotton growers of this section. The crop was gathered in the dry and the seed is of high germination. You will like this new early maturing cotton. Price per bu., \$2.50, F. O. B. Shawnee.

"Half and Half Cotton Seed"

This is the most successful cotton grown on the thin soils of this section. Our grower has made a great success in furnishing a superior seed, which by careful and constant selection has produced more than 40% yield this season. We have had reports of a $\frac{7}{8}$ -in. staple and 44% lint, which on the poorer land has produced a very satisfactory profit. It matures ahead of the boll weevil. It matures earlier than any other cotton. It has been bred to hold well in the boll, and is being used by the upland farmer more and more every year. While not as long staple as other varieties, yet it has its place and is grown at a good profit on the uplands of the south. Price per bu., \$2.00 F. O. B. Shawnee, Okla.

"Mebane Cotton Seed"

This old reliable cotton is still in highest favor, still further improved, drought resisting, very uniform in growth. Five lock bolls, strong and long length staple; you will find this variety always to be depended on. You can select no better variety for at least a part of your crop. Price per bu., \$2.25 F. O. B. Shawnee, Okla.

"Seed Samples"

We are glad to submit samples of Field seed when desired. You know then just what you buy. Of course, we make the same proposition that we have always made. When you order seeds from us and upon receipt of same, if not satisfactory in every way, they may be returned and your money will be refunded and all charges paid. You take no chances when dealing with us.

Special Testing Equipment

For testing seeds for purity and germination. We have the necessary equipment and a man who has had 20 years experience in testing seeds for purity and germination. Having taken the government course in this work, and being so well informed as to identity of all foreign seeds, he has become a highly specialized man for this work. This places us in a position to buy seeds by sample that are free from noxious as well as other weed seed and our customers run no more risk in befooling their fields with seeds that are unfit to plant. We are glad to submit samples of seed at any time on request.

When you buy Eclipse Brand seeds, you get the highest grade of seed that can be produced. Thoroughly re-cleaned and graded, of the highest purity and germination, packed in heavy secure packages for shipment, we conscientiously feel that we have served you as we would have you serve us. Your satisfaction is worth more to us than the small profit that we make from our sales. With this attitude, honestly expressed, we feel that we are as well equipped to serve you as any seed firm in the country. Every farm can make a greater profit by using the best seed.

Lower Your Production Costs Increase Your Cotton Yields

with **CERESAN**

The New Seed Cotton Disinfectant

By treating your seed cotton before planting, with CERESAN, the new dust disinfectant, you can frequently save from one-quarter to one-half the seed you formerly planted, avoid the cost and labor of replanting—and increase your crop yield.

CERESAN-treated seed germinates more uniformly—assuring even stands of vigorous, healthy plants.

CERESAN protects the seed from rotting in the cold, wet soil, permitting earlier planting and thus enabling the plants to set bolls before the boll-weevil starts its disastrous attacks.

Ask for
Free Booklet

CERESAN also reduces the number of plants killed by damping-off. It is effective in the control of seed-borne anthracnose and reduces the damage to the plant caused by seed-borne angular leaf spot.

By effecting a saving in the cost of seed sown, controlling seed-borne damping-off, root and boll rots, permitting earlier planting to protect against boll weevil attacks and increasing the yield of better grade crops, CERESAN repays its small cost many times over.

One pound treats over five bushels of seed.

Saves Seed • Improves Stands • Controls Disease

Inoculators, etc.

Crow-Tox

What "Crow-Tox" Does

Protects your corn during the period when it is most easily damaged, by ridding your fields of crows, pheasants, blackbirds, and other corn-pulling birds and animals, such as squirrels, woodchucks, moles, gophers, etc. "Crow-Tox" aids and hastens germination, makes healthier stalks, larger yield per acre, saves loss of seed and labor of re-planting. "Crow-Tox" is non-poisonous and will not injure any kind of corn. Neither will it clog any planter or kill birds or animals. But "Crow-Tox" will keep them away and prevent destruction of your crops by them.

To Use "Crow-Tox"

Put clean corn in metal container which liquid will not penetrate. Then pour "Crow-Tox" Repellent over the corn and mix thoroughly. After thoroughly mixing, put treated corn in planter. Do not use foreign substances for drying purposes, such as lime or plaster, as it is not necessary.

"Crow-Tox" Is Fully Guaranteed

"Crow-Tox" is a fully guaranteed product and should it fail to entirely satisfy the user, we will refund the purchase price without question.

Frost Proof Cabbage, Tomato and Bermuda Onion Plants

Frost Proof Cabbage

Owning, as we do, one of the finest sections of truck farming land in the heart of the "WINTER GARDEN BELT" of South Texas, we are enabled to grow for our customers the finest plants to be had.

Bermuda Onion plants

Our seed stocks for the production of these plants are imported from the best growers in the world.

We grow the famous Crystal White Wax and White or Yellow Bermuda onions by the millions and during the planting season receive them fresh daily. Also grow a splendid assortment of the Frost-proof Cabbage Plants, embracing the Early Jersey Wakefield, Early Flat Dutch and Copenhagen Market—these being time-tested varieties, giving best results.

We offer field grown tomato plants that are hard stemmed. We are growing the New Stone, Chalk's Ea. Jewel, Dwarf Champion, Spark's Earliana and other standard sorts.

Yellow Bermuda—6,000 in crate. Per crate \$4.00.

Cabbage Plants—5,000 lots, \$1.45 per 1,000. Express collect.

The Market Gardener

We had one gardener who exhibited thirty-eight varieties of vegetables at our county fair and scored four hundred and eighty-four points out of a possible four hundred and eighty-five points. The seeds used are the seed we offer you. Submit us your bill for the 1930 season, and let us surprise you with the prices we will make you for quality seed. Many market gardeners buy their seed from our store.

Our catalogue describes all of the best standard varieties, and the new kinds that have become popular. We are prepared to fill all orders, large or small, with our high grade seeds, believing that the best seeds that are produced are required to produce the maximum crop. Such seed is the only seed that you can buy from this store, and we solicit your orders on this basis.

Quality Garden Seeds That Succeed

The spring of nineteen hundred twenty-eight was a record breaker in our garden seed business. Thousands of orders came from all sections of the southwest and west. Quality seeds that succeed have made many customers for this store that have bought our seeds for more than twenty years. The greatest care is taken in procuring the best seeds grown and adapted to the southwest. Our years of experience have placed us in a position where we are able to offer only the seed that should be used in this section of the country. We buy only from growers, who have proved by constantly growing good seed, that the seed can be depended upon. In orders for garden seed we give liberal premiums, as well as more seed for the money, than most seedsmen. This policy is what has produced our wonderful garden seed business, and we will serve the new customer as well as the old. Try us for your spring requirements, we will satisfy you.

What One of the Master Farm Women of Oklahoma Has to Say for Our Line of Garden Seeds

This Letter Will Show How Customers Feel Towards Our Treatment of Them and Their Success With Our Seeds.

Earlsboro, Okla., Nov. 16, 1929.

I am glad to tell the Public that I bought my Garden Seed and Plants from Clarke and Keller. They were extra good seed and produced strong, healthy vegetables, which won for me the distinction of having the Highest Scoring Garden in the county. I often wonder why people order seed from afar or out of state when we can get the best right at our home. The people of Oklahoma are becoming educated to the need of pure bred seed and I do not believe better seed can be found anywhere than at Clarke & Keller's, at Shawnee, Okla.

Mrs. Ed McMoran,
Earlsboro, Okla.

Eclipse Brand Garden Seed

Asparagus

See page 32 for one and two-year-old roots.

Eclipse Brand Beans

Plant from first of April on through until fall, when moisture conditions are favorable. Sow in rows $2\frac{1}{2}$ to 3 feet apart. One quart will sow 200 feet of row.

McLoud, Okla., R. R. No. 1, Nov. 16, 1929.
Clarke & Keller Seed Store,
Shawnee, Okla.
Dear Sirs:—

I am glad to advise you that I have bought and planted your garden seed for the past fifteen years with good success.

In the 1928 garden contest sponsored by the O. F. S. and the Extension Division of the A. & M. College, my garden received highest score for Pottawatomie County and Second highest score in the Southeast District of Oklahoma.

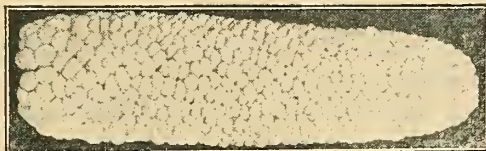

Yours truly
Mrs. Joe Seikel.

Stowell's Evergreen Sweet Corn

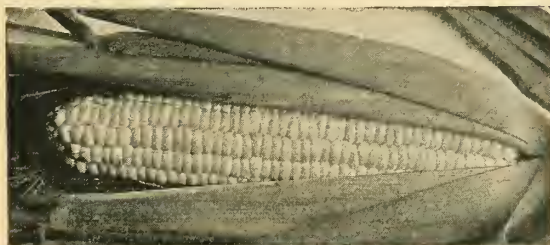

Eclipse Brand Sweet Corn

For early market, plant the garden varieties latter part of March. Sugar Corns should not be planted until April. One gallon to the acre usual amount required.

SHAWNEE, OKLAHOMA

Eclipse Brand Peas

The English pea is hardy and endures cold well, either in or above ground. It is best to sow the earliest varieties as soon as possible (February) in warm, light soil, prepared the previous autumn or winter. The main crop may be sown about two weeks later and on somewhat heavier soil. One quart will sow 100 feet of drill.

Your Flower Garden

Can a pretty flower garden be overestimated? For health and beauty, nothing adds more to the home than flowers. Easy to grow and inexpensive in cost or labor the grower is repaid many times in the effort made. We have flower seed in our store that is grown for us in all parts of the world. We know just what is needed for the Southwest. We sell thousands of packets of these seeds every year and it is growing by leaps and bounds each year. Our Special Zinnia, Dahlia and Marigold flower seed, grow the largest blooms that can be produced. You will be pleased with these as well as all other flower seed we offer. These three special varieties sell at 50c per packet, postpaid. Other flower seed listed sell in 5c and 10c packets.

Flower Seeds

We purchase our flower seeds from the most reliable growers in this country and Europe. The seed we offer is of the finest varieties that grow, and we are sure that our customers will be satisfied with the beautiful flowers produced from these seeds. Add cheerfulness to the home and attractiveness to the surroundings where you and your family spend so much of your time. Flower Seeds put up in 5c and 10c packets. Special prices in ounce lots.

Cyclone Hand Seeders

Every farm should have one of these handy seeders. Sows anything from alfalfa seed to oats and all grass seeds where you desire to broadcast the crop. Priced each, \$2.25.

Save Baby Chicks at the Start

Conkey's Buttermilk Starting Feed is the original Baby Chick Starting Feed. Like Conkey's Remedies, it is of the highest possible quality. It contains the essential ingredients that make a quick growth and bring the pullet to quick production. No chicks are lost from White Diarrhea or other diseases and the small cost of feeding is many times saved in the number of chicks that mature.

The feed is pure and sweet and is highly palatable. They go after it with ravenous appetites and grow like weeds. We would have to quit the poultry business if we discontinued the sale of Conkey's Buttermilk Starting Food. It is as sweet and clean as your breakfast food and absolutely essential in the successful raising of the greatest percentage of your chicks.

The prices are:

View of Seed-Cleaning Equipment

NOTICE—We can store 125 cars of seeds in our fire-proof warehouses, and during the greater part of the season we have large stocks of all seeds listed; we quote you prices, however, subject to stocks remaining unsold, stenographic errors and omissions and contingencies beyond our control. We have the most intense confidence in our seeds, believing that we sell you just what you ask for. We, and you, know that we have no control over seed after it leaves our hands; we cannot control the natural laws that sometimes affect seeds, nor can we furnish the season for you by which your crops should mature from our seeds. Planted too deep or too shallow, too much rain or too little, baked, crusted soils which will not allow the tender shoots to penetrate, and insects, which often destroy the young plants, are beyond our control.

NON-WARRANTY—The Clarke & Keller Seed Store gives no warranty express or implied as to description, quality, productiveness, or any other matter of seeds (bulbs or plants) it sells and will not be responsible for the crop.

When ordering seeds shipped by parcel post, be sure to enclose money to cover the cost of shipment. The zone and rate of table below will assist you to figure the cost of sending.

A glance at the map will show the zone you are in, measuring from Shawnee. If in doubt, ask your postmaster. The parcel post rates are as follows:

Parcel Post Zone Rates

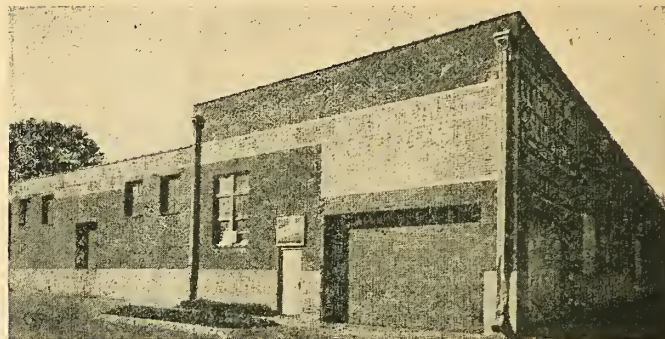

Zone.	Distance from Shawnee	First lb.	Additional	Weight limit
		or fraction.	lb. or fraction.	
1—Within 50 miles.....		7c	1c each	70 lbs.
2—Within 50 to 150 miles		7c	1c each	70 lbs.
3—Within 150 to 300 miles		8c	2c each	70 lbs.
4—Within 300 to 600 miles		9c	4c each	50 lbs.
5—Within 600 to 1,000 miles		10c	6c each	50 lbs.
6—Within 1,000 to 1,400 miles		11c	8c each	50 lbs.

The above rates are the New Rates, effective April 15, 1925. First pound or fraction column includes the 2c service charge.

When figuring the number of pounds' weight in your order, allow 1 pound extra for packing and sacks, as our seeds are put up net, which means "full weight"—without sacks or wrappers.

Greetings

Q—Clarke & Keller Seed Store extend best wishes for a Merry Christmas and a Prosperous, Happy New Year. Can we help you enjoy a prosperous year by supplying seeds that are the best at any price? Try us with an order. You will be satisfied.
